PROFESSIONAL EXPERIENCE

SEO Executive **Aug 2025 – Present**
Quantum IT Innovation | Remote

- Manage end-to-end SEO for multiple international client websites across diverse industries, ensuring consistent on-page, off-page, and technical execution.
- Conduct keyword research and competitor analysis to uncover high-impact content opportunities and strengthen organic visibility.
- Run technical SEO audits using Screaming Frog and Google Search Console, identifying and resolving crawlability and indexing issues to improve site performance.
- Optimize meta titles, meta descriptions, headings, URLs, and internal linking structures across client sites to support stronger search rankings.
- Lead backlink acquisition through guest posting, directory submissions, and outreach, contributing to improved domain authority.
- Track performance trends using GA4 and Search Console, coordinating with content and development teams to act on insights.
- Upload and optimize product listings on WordPress and Shopify, improving product discoverability in search results.
- Manage Shopify store SEO and day-to-day store updates, optimizing product and collection pages, meta tags, and image alt text.
- Optimize Google My Business (GMB) / Google Business Profile listings to strengthen local SEO and visibility in local search and Maps.
- Plan and run email marketing campaigns to engage customers and drive traffic to client websites and Shopify stores.

SEO Executive **Apr 2025 – Jun 2025**
Smart King Technologies | Mohali

- Executed off-page SEO campaigns, including backlink building, guest posting, social bookmarking, and directory submissions, to support client growth goals.
- Contributed to measurable gains in domain authority and organic visibility for client websites.
- Conducted competitor and backlink analysis to inform outreach strategy and uncover new link-building opportunities.

Trainee **Dec 2023 – Jun 2024**
RMSI Pvt. Ltd. | Dehradun

- Performed 2D and 3D geospatial data annotation for Kognic mapping projects, maintaining high accuracy for datasets used in autonomous driving applications.
